**BÜHLER**

# Bühler offers specialised training in Paddy Processing / Rice Milling for **Bühler Rice Mill Operators.**

Bühler touches everyone's life every time, everywhere. Globally, Bühler is a leading player in providing solutions and technology to global eating habits. This involves developing efficient processes that combine traditional know-how and innovation to meet global needs.

Rice is an important staple food of the South Asian region, and is grown on a large scale in countries like India, China, Sri Lanka, Bangladesh, etc. To convert paddy into ready to use rice, a high degree of engineering is required.

Bühler South Asia, being the Centre of Competence in rice milling, provides best in class solutions to rice processing industry.

Through continuous innovation and specialised technology, Bühler has empowered the small, medium and large scale rice millers to maximise productivity and profit.

## Training Highlights

Bühler training program provides excellent knowledge and skills to operate rice mills in an efficient way. A trained operator does not require close supervision as he / she is familiar with the machines, equipments, etc. and with enhanced skills, damage to equipment and machines are minimised, thereby reducing cost.

Customers can avoid wastage of time and productivity loss and remain competitive by optimising resources and operations.

Trained operators can operate machines independently, trouble shoot quickly, reduce machine down-time, take quick decisions and aim at improving the performance of the mill.

# Rice Mill Operators Training.

## Topics

### Theory

- Paddy and rice varieties
- Testing paddy quality and impurities
- Working principles of cleaning and milling machines
- Weighing scales and colour sorters
- Machine settings, machine operation, maintenance and troubleshooting
- Machine control systems
- Dismantling and assembly of Whitener and Polisher machines
- Spare parts and inventory

### Practical

- Analytical lab – testing paddy and impurities
- Machine operation and settings
- Assembly and servicing of Whitener and Polisher
- Aspiration – checking, setting and maintenance of fans, cyclones and airlocks
- Checking and maintenance of sieves – Classifier Separator, Destoner, Whitener, Polisher
- Variable Speed Drive unit settings
- Spares identification and inventory

## Course fee

**Rs. 20,000/-** (Non-refundable)

**Batch size** - 6 to 8 Participants

**Duration** - 5 days (Monday to Friday)

**Accommodation and Travel** - To be arranged by participants. Complementary lunch and coffee / tea will be provided to the participants at the venue.

**Venue** - Bühler India Pvt. Ltd, Bengaluru

**Eligibility** - Participants should be 18 years and above and shall have a minimum of 3 months experience in any rice mill.

**Medium of instruction** - Kannada, Hindi, English, Tamil or Telugu

All printed material will be in English

**Nominations can be sent by filling the attached application form.**
