

## GrainiGo™

Instant maize  
quality analyzer.

**GrainiGo™ is a quick and reliable quality tool, analyzing both internal and external characteristics of maize kernels.**

GrainiGo™ is designed to be used at any point in the production chain to provide an almost instant yield and quality analysis within minutes. It is composed of a light box and a cloud-based analyzer accessible with your mobile phone.

- Helps to assess the **expected milling yield, stress cracks, broken kernels, and size distribution**, in less than 5 minutes.
- Receive **quality information** instantly and in an easy to read format.
- Access your **historical quality data summarized** in a dashboard, at anytime anywhere.
