

Insulation for DIP.

New insulation for Diffusion Pump 12.000 and 20.000.

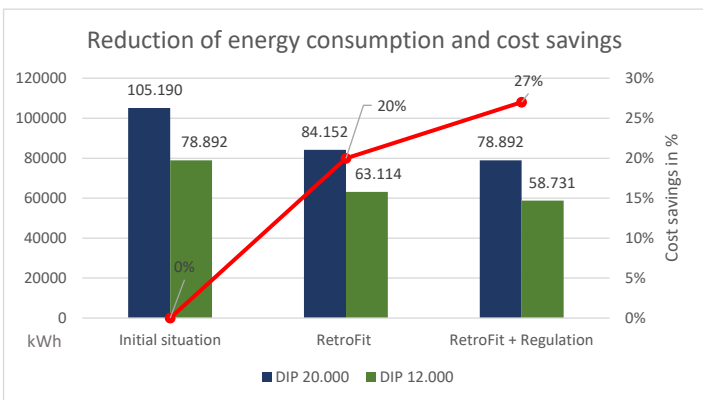

The insulation for Diffusion Pump DIP 12.000 and 20.000 is an ideal tool for industrial high vacuum applications.

The insulation is characterized by outstanding vacuum-technical performance data and is a reliable component in fine and high vacuum units due to resistant construction.

We strongly recommend to retrofit the insulation for Diffusion Pump DIP 12.000 and 20.000 during maintenance to keep installation time as short as possible.

Please contact your local Bühler organization for further information.

* All general Terms and Conditions apply.

Benefits:

- Up to 30% energy conservation without power loss
- Simple installation and start-up
- Decrease of ambient temperature
- Decrease of temperature of cooling water
- Fast ROI

Order number:

- DIP 12.000 LONT-34767-001
- DIP 20.000 LONT-34768-001
